Steps toward Savings

1. Call [1-800-797-6699](tel:1-800-797-6699) for a FREE home energy assessment
2. Our vendor will conduct an energy assessment in your home and recommend improvements to save you energy and money
3. Benefit from rebates and incentives for recommended energy improvements you select

Please note that there is no additional charge for the energy assessment as you already pay into the [Energy Efficiency Fund](#) (which primarily funds these programs), through your electric bill.
