Re: 1546 Baker Avenue, Wellfleet

Members of the Board:

It is proposed to remodel the existing building at 1546 Baker Avenue in Wellfleet. This remodel will include demolition of an existing wing at the house and reconstruction of the wing with a new second floor which will increase the habitable area. In 2005, the Board of Health approved a septic system for this property with an Alternative Treatment System and variances. The approval included a condition that any increase in habitable area requires Board of Health review, hence the purpose of this filing.

Enclosed are plans of the existing building and the proposed construction. While there will be an increase in the habitable space, there will not be an increase in the number of bedrooms. Therefore, it is my opinion that the existing septic system and Alternative Treatment System are adequate for the intended construction.

I look forward to meeting with you to review the plans. If you have any questions prior to the meeting, please feel free to contact me any time.

Sincerely,

Timothy J. Brady, PE/PLS
President
