

# It's a Climate Emergency!

## What We Can Do!

The Wellfleet Energy and Climate Action Committee will present a three-part series of workshops on **Combating Climate Change**.

With a bit of foresight, we can avoid using technologies that will need to be replaced in order to achieve our goal of reaching net-zero emissions by 2050. These three workshops focus on what we, as individuals, can do to help reduce greenhouse gases.

Session 1 - Wednesday August 31 - 7:00 PM-8:30 PM

- **Household Electrification and Energy Conservation:** Home heating, cooling, appliances, and conservation, presented in conjunction with the Cape Light Compact

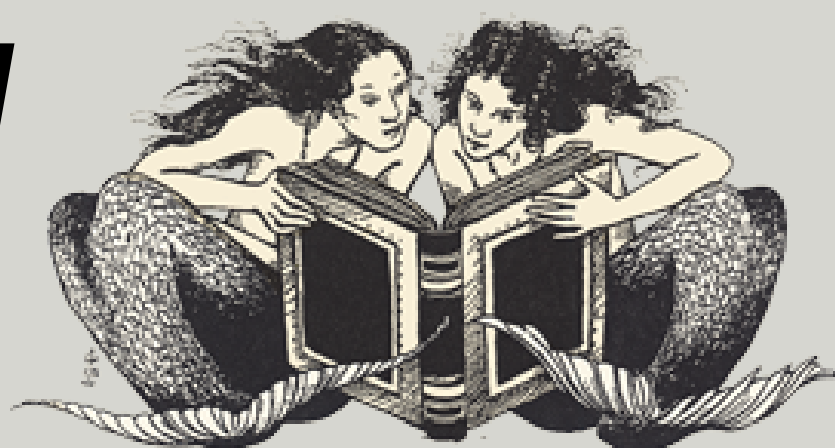

Session 2 - Wednesday September 14 - 7:00 PM-8:30 PM

- **Electrifying Transportation:** Electric vehicles, how much fun they are, and when will they be less expensive than fossil fuel vehicles? This is the future! Discussion of charging stations and example of a road trip

Session 3 - Wednesday September 28 - 7:00 PM-8:30 PM

- **Solar Photovoltaic Arrays:** How does it work, how much you can save, and a Q&A session with PV vendors

**Wellfleet Public Library**  
**55 West Main Street**  
**(508) 349-0310**

**Free to the public**  
**Seating is limited**  
**Face masks required**
